Save time and money with OPICO's Vari-Disc Duo. High speed soil loosening and surface cultivation in one pass!

The OPICO Vari-Disc is ideal for primary tillage, incorporating crop residues and creating stale seedbeds but can also be adjusted to perform well as a secondary cultivator working down a seedbed.

The Vari-Disc Duo range comprises of 3 models each with a compatible Vari-Tilth to allow deep soil loosening at the same time as surface cultivation and start from £11,250. All Vari-Disc models are fitted with a heavy duty Disc hub and bearings which carry a 2 year parts warranty.

1

Tine Attack

The Vari-Tilth integrates between the Tractor and Disc giving the ability to incorporate surface residues and loosen the lower soil structure in one pass.

2

Disc Action

Each Disc is laid over at 21° to the vertical which ensures superb mixing and incorporation whilst the angle of cut can be adjusted to suit the conditions.

3

Crush and Consolidate

The heavy cast Prisma Rollers grinding action breaks up clods and consolidates encouraging weed seed germination and leaving the land weatherproof.
