

ADD A VARIOCAST AND SAVE EVEN MORE MONEY

Cut seed rates and establishment costs whilst improving yields

Utilise a Variocast to take advantage of Till-Seeding techniques and improve gross margins.

- ✔ Precise Seed Metering
- ✔ Even Seed Distribution
- ✔ Accurate Seedrate Control
- ✔ Ground Wheel Drive

TILL-SEEDING

SPECIFICATIONS

MODEL	WORKING WIDTH	TRANSPORT WIDTH	HP REQ.	WEIGHT
-------	---------------	-----------------	---------	--------

VARI-DISC DUO - Complete with 450mm standard crumpler roller

Vari-Disc Duo 300	2.95m	3m	85-100	990 kg
Vari-Disc Duo 330	3.25m	3.5m	90-120	1080 kg
Vari-Disc Duo 480	4.75m	2.6m	150-175	2290 kg
Vari-Disc Duo 630	6.25m	2.6m	200-240	2790 kg

VARI-DISC DUO - Complete with 450mm Prisma Roller

Vari-Disc Duo 300	2.95m	3m	85-100	1205 kg
Vari-Disc Duo 330	3.25m	3.4m	90-120	1332 kg
Vari-Disc Duo 480	4.75m	2.6m	150-175	2616 kg
Vari-Disc Duo 630	6.25m	2.6m	200-240	3260 kg

VARI-DISC QUAD - Complete with 450mm standard crumpler roller

Vari-Disc Quad 330	3.25m	3.5m	110-150	1800 kg

OPICO'S VARI-DISC

TINE ATTACK

DISC ACTION

CRUSH & CONSOLIDATE

HIGH SPEED CULTIVATION
OF THE ENTIRE SOIL PROFILE

1•2•3 GO!

High speed cultivation of the whole soil profile in one pass!

The Vari-Disc Duo range is fitted with Heavier Duty Hubs and bearings with a 2 year Warranty and incorporates rigid and hydraulic folding machines up to 6.25m working width, all available with the Vari-Tilth soil loosening tines.

Vari-Tilth

Vari-Disc Duo

1 TINE ATTACK

The Vari-Tilth Integrates between the Tractor and Disc giving the ability to incorporate surface residues and loosen the lower soil structure in one pass.

2 DISC ACTION

Each Disc is laid over at 21° to the vertical which ensures superb mixing and incorporation whilst the angle of cut can be adjusted to suit the conditions

3 CRUSH & CONSOLIDATE

The heavy cast Prisma Rollers grinding Action breaks up clods and consolidates encouraging weed seed germination and leaving the land weatherproof.

DISC ADJUSTMENT

HEAVY DUTY HUB WITH 2 YEAR WARRANTY

DEPTH ADJUSTMENT

THE VARI-DISC RANGE

Added penetration and Medium depth Soil loosening.

Vari-Tilth

When not in use the Vari-Tilth can easily be disconnected from the Discs or simply adjusted to clear the ground and left connected.

Adding the standard Vari-Tilth to the front of the Vari-Disc Duo helps penetration in hard conditions and allows the entire soil profile to be moved in one pass. The heavier framed HD Vari-Tilth is designed to be used in a similar way in front of the Vari-Disc Quad.

The working depth of the Vari-Tilth (down to 300mm) is easily adjusted using 2 pins to set its depth in relation to the Discs behind.

The Vari-Disc Duo has been sold on the Uk Market for over 15 years and it now has many followers.

The simple angle adjustment of individually mounted discs themselves leant over at 21 degrees enables the Duo to work in many different conditions.

It is ideal for primary tillage, incorporating crop residues and creating stale seedbeds but can also be adjusted to perform well as a secondary cultivator working down a seedbed.

Vari-Disc Duo

Vari-Disc Quad

The heavier longer Vari-Disc Quad has 4 rows of wider spaced discs allowing it to cope with larger amounts of crop residue and make a superb job of incorporation.

The Vari-Disc Quad is mainly used as a primary cultivator, however the disc angle adjustment allows it be set up for secondary work aswell.

Add the HD Vari-Tilth and you have an exceptional tine and disc cultivator capable of moving soil up to 300mm deep.
